

C200

Hassle-free + Compact

The C200 is one of the most advanced LPG cylinder design to date. C200 comes with state-of-the-art features to ensure 100% usage, so you get exactly what you pay for.

Industries served:

Industrial

Hospitality

Commercial

why C200?

Compact and advanced technological innovation to ensure maximum efficiency. Only pay for the gas you have used. Suitable for users with limited storage.

Benefits of C200 LPG Cylinders

Eliminate recurring man-hour costs required for handling/changeover of cylinders

Minimal/no cost involved for tank farm installation* (depending on the tank farm size and LPG usage), consumers only pay for LPG cost

The level gauge lets you utilize gas effectively. No wastage, no hidden costs, no potential hazards

Tele-metrics enable us to monitor your LPG usage level. This lets us know when refueling is required

Other Benefits

- Excess flow check and safety relief valves and pressure gauge to ensure maximum safety
- On-site filling eliminates dead stock of standby LPG cylinders. Reducing inventory carrying costs

* Terms and Conditions applied.
