

C50

Versatile, Clean and Efficient

The C50 cylinders are one of our most widely used LPG gas cylinders, most commonly used by hotels, factories, resorts, food courts, restaurants, canteens etc. The convenient 50KG cylinder comes in different types to suit different appliance needs.

Industries served:

Hospitality

Commercial

why C50?

Maximum safety and versatile usage, ideal for restaurant, hotel and commercial usage.

Benefits of C50 LPG Cylinders

- Operates safely in high heating value
- Easy to handle
- Wide distributors network for quick delivery
- Regular cylinder maintenance to ensure cylinder is always clean with adherence to high safety standard for practical usage

Types of C50 Cylinders

C50 Compact

Suitable for low consumption usage. Recommended for vapor outlet LPG

C50 Pol

Suitable for medium consumption usage as these C50 pol cylinders have increased speed flow rate compared to compact ones. Recommended for vapor outlet LPG

C50 Liquid Withdrawer

Suitable for high consumption usage. This cylinder is optimised for liquid outlet LPG. Consumers can choose LWC cylinder and convert the liquid to vapor by installing a vaporizer

C50 Dual Valve

Dual valve gives you the functionality of both liquid withdrawal and vapor pol
