

# C200

Hassle-Free Fuelling  
+ Compact Design

## Efficient & Cost-Saving LPG Solution

For the Industrial & Commercial sectors, the C200 solution presents the most advanced Liquefied Petroleum Gas (LPG) system to date; featuring state-of-the-art innovations to ensure maximum production and efficiency in manpower. Enjoy direct cost savings by paying exactly what you've used with no hidden, added costs and zero wastage.

### Industries Served:

Industrial

Hospitality

Commercial

## The C200 Solution at a glance

- DOT design: NGC Energy is the first to obtain a DOT approved design on the C200 solution.
- Compact cylinder design: No requirement on safety distance. (Standard Industrial tanks require at least 7m distance)  
The C200 solution can be installed right next to your premises. (T&C apply)
- Easy adaptation: C200 solution is tailor-made to suit your usage requirements.
- Enhanced safety & convenience: Experienced haulier drivers that are well-trained in safe delivery protocols.
- No pilferage of gas: Theft and loss of cylinders is not an issue as the C200 solution is built in your premises.
- No PMT certification renewal: Does not require annual PMT certification renewal.
- Pre-planned delivery: Scheduled & urgent deliveries can be arranged to avoid gas shortages. (T&C apply)

# Benefits of the C200 Solution

**Manpower Efficiency:** No manpower required in handling/changeover of cylinders, which allows you to increase production efficiencies.

**Monitor Gas Usage:** No wastage, hidden costs & hazards.

**Zero investment:** No investments required in tank farm installation. (T&C apply)

**Small footprint:** No safety distance required as the C200 solution is compact in size allowing your tank farm to be built right beside your premises.

- Filler valve with a unique smart cylinder feature that prevents overfilling. Other features include excess flow check and content gauge to ensure maximum safety.
- On-site filling eliminates dead stock of standby LPG cylinders, thus reduces inventory carrying costs.

## A Reliable & Complete LPG Solution

- Constant research & development in improving the C200 Solution.
- 3 tonne bobtail tanks able to fit through narrow spaces for delivery. (Perfect for business premises with limited space)
- Preventive maintenance via leak tests, rectification, repair and functionality tests for gas equipment.
- Highly trained engineers on call to optimize your tank farm.
- Annual LPG safety training provided to your employees.
- License renewal assistance, application and engineering consultation.
- Installation & piping modifications.
