

C50x |

Cost Efficient
+ Plug & Play

The first refillable 50kg manifold system in Malaysia

C50x will revolutionise the way businesses use gas. It is readily outfitted with the best equipment in the industry to ensure maximum space, cost & energy efficiency. The hybrid C50x combines the cost saving features of industrial gas tank systems with the ease in installation & size of commercial 50kg manifolds.

Industries Served:

Industrial

Laundry

Restaurant

The C50x Solution at a glance

- **Smart cylinder design:** Unique smart cylinder feature that prevents overfilling. This is to ensure the safety & integrity of your tank farm.
- **Enhanced safety & convenience:** The C50x comes with a Filler Valve, Dual Valve with Excess Flow Check & Content Gauge to ensure maximum safety of staff & business operations.
- **Auto changer:** The auto change over feature also allows the C50x to transfer an empty manifold bank to another.
- **Plug & play:** Plug & Play with the C50x. Adaptable with existing 50kg manifold systems. (T&C apply)
- **Cost saving:** The C50x system eliminates dead stock of standby cylinders, reducing inventory carrying costs. Worry no more about cracked floor tiles & manpower wastage.
- **Space saving:** Backup storage space will not be needed, allowing you to utilize factory space on other needs.

Benefits of the C50x Solution

Small footprint: No safety distance required. The C50x is compact in size, allowing your tank farm to be built right beside your premise. (T&C apply)

Telemetry: Feature that notifies you when your gas tank is time for refilling. Prevents downtime and loss of production as you are able to manage your gas volume perfectly and no more last minute refuelling.

Refillable: Filling valve enables C50x to be refilled on the spot. Avoid the risk of downtime from unreliable gas dealers while enjoying continuous uninterrupted supply.

Ease of Use: Zero manual changeover & handling needed. Minimal manpower is required as refilling will be carried out by NGC Energy.

Cost saving, convenient & compact.

- Multi-valve LPG cylinder option enables flexibility for you to choose between liquid or vapour depending on your consumption.
- Zero Interruption in gas being delivered is now possible with Industrial 4.0 telemetry technology. Once prompted, a delivery load will arrive on schedule to refill your tank farm, so you will get your gas on time when you need it most.
- No more inventory stock keeping & cylinder mismanagement with the C50x.
- Zero costs incurred in initial tank farm investment, tank service maintenance & repairs with the C50x system. (T&C apply)
- While conventional 50kg LPG cylinders tend to waste 10-20% gas due to residue, the new C50x allows you to fully utilize your LPG.
