

C14C | Compact

Compatible & Efficient

The MiraGas C14C cylinder offers a smart and efficient solution for businesses using compact regulator systems. Designed for plug-and-play compatibility, it ensures reliable gas delivery across a variety of applications from restaurants and cafés to commercial kitchens and laundromats.

Benefits of the C14C Cylinders

COMPACT REGULATOR COMPATIBLE

Connects directly to standard compact regulators – no additional fittings required.

CONVENIENT

Easy to set up and integrate, making it ideal for restaurants, laundromats, and small commercial operations.

RELIABLE PERFORMANCE

Delivers consistent gas flow for dependable daily commercial and light industrial use.

C14P | POL

High Flow & Durable Performance

The MiraGas C14P cylinder is engineered for high-demand commercial and industrial environments where strong, continuous gas flow and system durability are essential. Equipped with a high-capacity POL valve, it is well-suited for high-pressure burners in restaurants, central kitchens, and various industrial applications.

Benefits of the C14P Cylinders

HIGH FLAME OUTPUT

Ideal for high-volume cooking, boiling, or steaming.

DURABLE QUALITY VALVE

Built with high resilience to minimise leakage risks and enhance safety, especially in heavy-use settings.

PORTABLE & PLUG-AND-USE

No manifold required, great for mobile and fixed setups.

VERSATILE APPLICATIONS

Widely used across commercial and industrial businesses.
