

# F14 FORKLIFT GAS

FUEL YOUR FORKLIFTS WITH  
EFFICIENCY AND SAFETY

NGC Energy offers two reliable non-refillable forklift LPG cylinders: One with an integrated with content gauge for easy monitoring and one without content gauge. Both are designed to enhance performance and safety for your forklift fleet.

## Who Will Use These Cylinders?

Our F14 Forklift Gas are ideal for industries that rely on continuous forklift operations, including warehouses, distribution centers, and manufacturing plants. Designed to provide reliable fuel, ensuring your equipment stays powered throughout the workday.

Specially Optimised  
Performance For  
Forklifts

Scan for more  
information

### Efficiency:

Consistent fuel for uninterrupted forklift operations

### Safety:

Equipped with built-in safety mechanisms, including pressure relief

### Easy Installation:

Quick, hassle-free cylinder installation

### Sustainability:

Eco-friendly LPG fuel for a cleaner operation

## F14 WITH CONTENT GAUGE

- Instant Gas Level Visibility
- Prevent Unexpected Downtime
- Improve Safety
- Better Planning and Management
- Cost-Effective

## F14 WITHOUT CONTENT GAUGE

- Reliable & Ready to Use
- Simple & Low Maintenance
- Safe & Clean Design
- Trusted by Industry
- Efficient Workflow

## KEY SAFETY PRACTICES

### Inspect Cylinder:

Before installation, check for leaks or damage.

### Wear Safety Gear:

Always wear gloves and protective gear.

### Proper Storage:

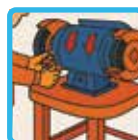

Store cylinders in a well-ventilated area, away from heat.

### Professional Handling:

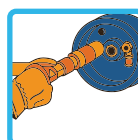

Installation should always be done by certified personnel.

## EASY INSTALLATION

### Step 1:

Position the cylinder.

### Step 2:

Connect the gas line.

### Step 3:

Secure and start forklift.

See how our cylinders connect to your forklift's fuel system for smooth and efficient operation.
